

## Windows Instruction: Composing Digital Media How-to Portfolio

Template: <https://github.com/Pitt-Fuego/digital-media-course-portfolio>

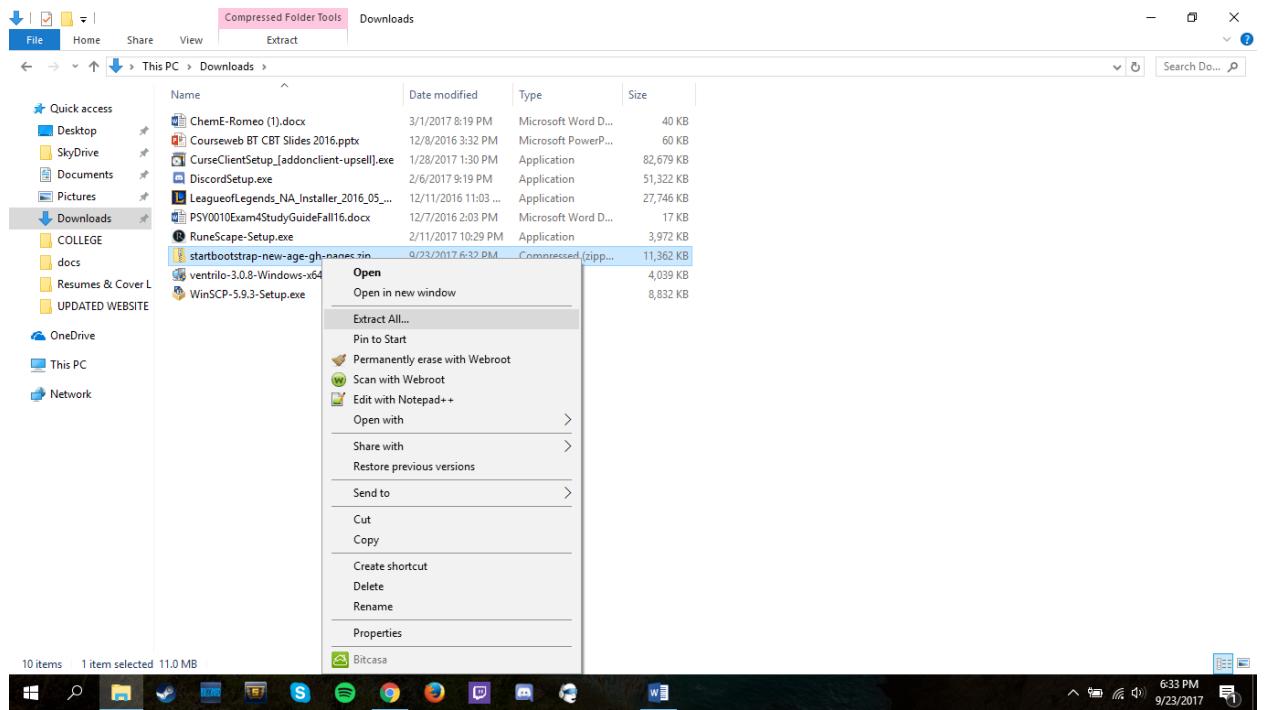

### Cartoon and Design

1. Go to <https://github.com/sjquigley/digital-media-portfolio>

File	Last Modified
DME.md	8 days ago
upload	7 days ago
ename sublicense to license	8 days ago
upload	10 days ago
upload	7 days ago

2. Click Download

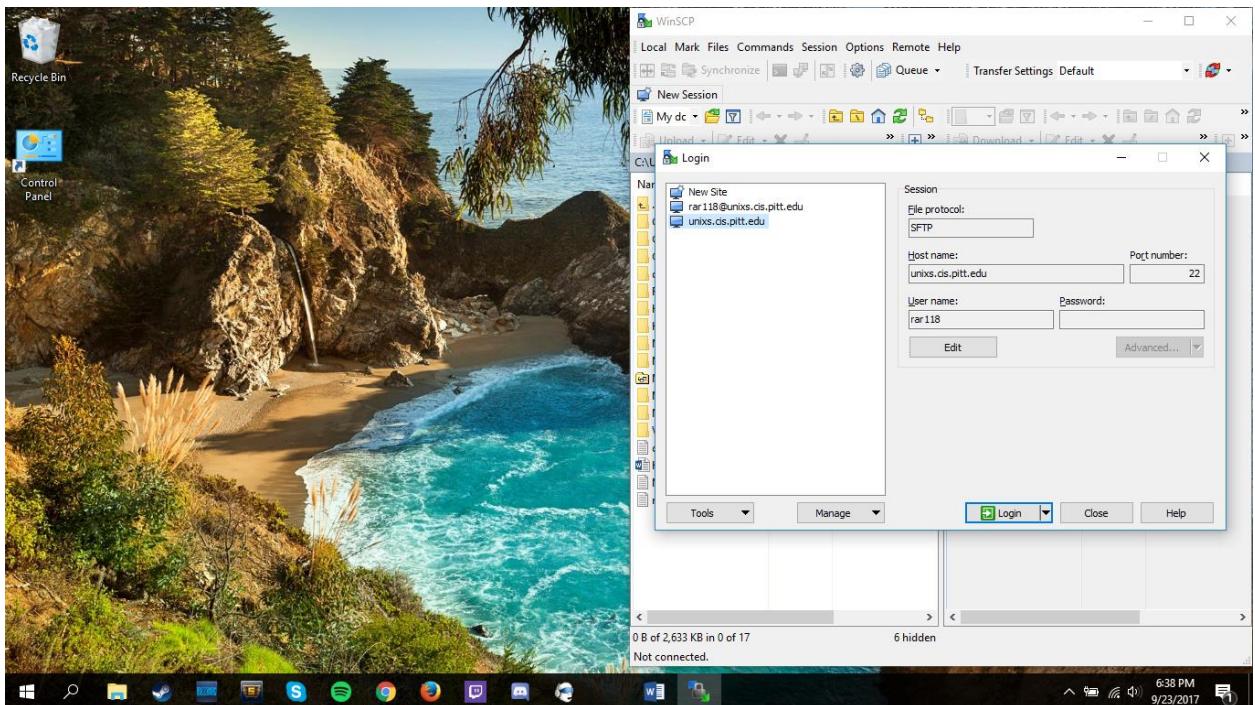

### 3. Extract the ZIP file that appears

/Users/sjq4/Desktop/Composing Digital Media Portfolio/index.html (Getting Started) — Brackets

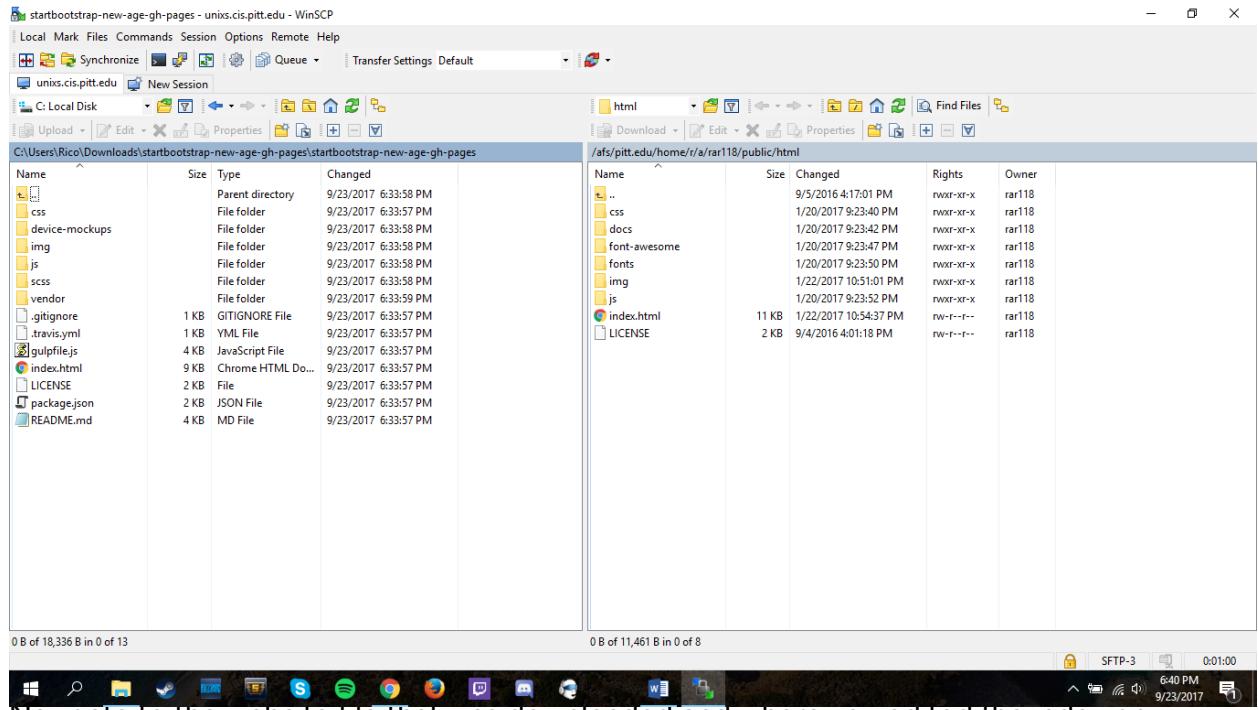

4. Open the extracted folder and edit the index.html with any text editor (Atom, notepad++, VB, etc.)

```
/Users/sjq4/Desktop/Composing Digital Media Portfolio/index.html (Getting Started) — Brackets
19 </div>
20 </div>
21
22
23
24
25 <div class="container-fluid bg-w text-center">
26   <h1>Cartoon and Design</h1><br>
27   <div class="row">
28     <div class="col-sm-4">
29       <h3>Title</h3>
30       <a class="portfolio-link" data-toggle="modal" href="#portfolioModal1">
31         <div class="hover">
32           
33         </div>
34       </a>
35       <p>Lorem ipsum dolor sit amet, consectetur adipisicing elit, sed do eiusmod tempor incididunt ut labore et
36         dolore magna aliqua.</p>
37     </div>
38     <div class="col-sm-4">
39       <h3>Title</h3>
40       <a class="portfolio-link" data-toggle="modal" href="#portfolioModal2">
41         <div class="hover">
42           
43         </div>
44       </a>
45       <p>Lorem ipsum dolor sit amet, consectetur adipisicing elit, sed do eiusmod tempor incididunt ut labore et
46         dolore magna aliqua.</p>
47     </div>
48     <div class="col-sm-4">
49       <h3>Title</h3>
50       <a class="portfolio-link" data-toggle="modal" href="#portfolioModal3">
51         <div class="hover">
52           
53         </div>
54       </a>
55       <p>Lorem ipsum dolor sit amet, consectetur adipisicing elit, sed do eiusmod tempor incididunt ut labore et
```

5. This is where to edit the actual script – just replace all there filler with your stuff, comment out sections, etc. Save when finished and double-click the index to preview in-browser.

- When satisfied, open WinSCP. Enter `linux-ts.it.pitt.edu` for host name, `pitt` username, and click login. Enter `pitt` password, then click okay two or three times.

7. Navigate to the website file that was downloaded and where you edited the index on the left, and on the right the directory should be /afs/pitt.edu/(your first initial)/(your second initial)/(your pitt login)/public/html (you may need to create an html directory.)  
Copy ALL the files from the left to the right (mine does not look the same because my current website is not the same as this example I'm using).
8. Close WinSCP. It may take a few minutes to update, but your website will be sites.pitt.edu/~(your pitt login)
9. You are awesome!

(Note: Note, you can run multiple websites from your Pitt Server. Go into your html folder and right click>create directory>name new directory with a single word or words\_with\_underscores. To access this directory, go to sites.pitt.edu/~yourusername/new\_directory)

(Problems? You might need to add server space. Go to: my.pitt.edu.>Accounts Self-Service> Email & Messaging > Drop Down "UNIX Quota.")
